

MMC PNEUMATIC CONVEYING

Features :

- Conveying through Root Blower or centrifugal fan.
- Applicable for all sizes of containers or trucks.
- Material like loose DOC, Wheat, Soybean.
- Easy handling., Maintenance free.
- Mobile system (On customer requirement)

MMC MAGNET & MAGNET BOX

A Magna Roll is used for separate metallic particles from free flowing material like in wheat, Soybean etc; it is also used in SUJI & RAWA.

Features:

- 1) Material of construction – SS.
- 2) Enters from the feeding hopper, moves on the powerful magnetic roller which is separate the metallic particles from goods.

Material enters the rectangular shaped magnet box from the inlet on the upper side, passes over the magnet rods which are fitted in into the sliding tray for timely cleaning. Sliding provides easy removal of metallic particles.

MMC VIBRO/SILO DISCHARGER

Silo Discharger is used to discharge the bulk flour and similar product from the silos to provide the smooth flow operation.

Features :

- 1) Connecting rods with rubber bush & vibratory motor fitted in the bottom of round dish.
- 2) To avoid leakage, a rubber bellow bounded tightly around the dish.

MMC FOOD GRADE TANKS

Features :

- 1) Material of construction in MS / SS. 2) Offered in full welded or full bolted.
- 3) Designs of tanks are completely based on customer requirements and load capacity.
- 4) Food grade varnish from the inside and two coats of epoxy paint from outside. (Installation of tanks on the site is also done by MMC.)
